

# THE STEP-UP DIFFERENCE

*For students that wish to take their playing to the next level, Step-Up instruments offer refined sound, intonation, feel, and flexibility. But more importantly, they're simply more fun to play!*

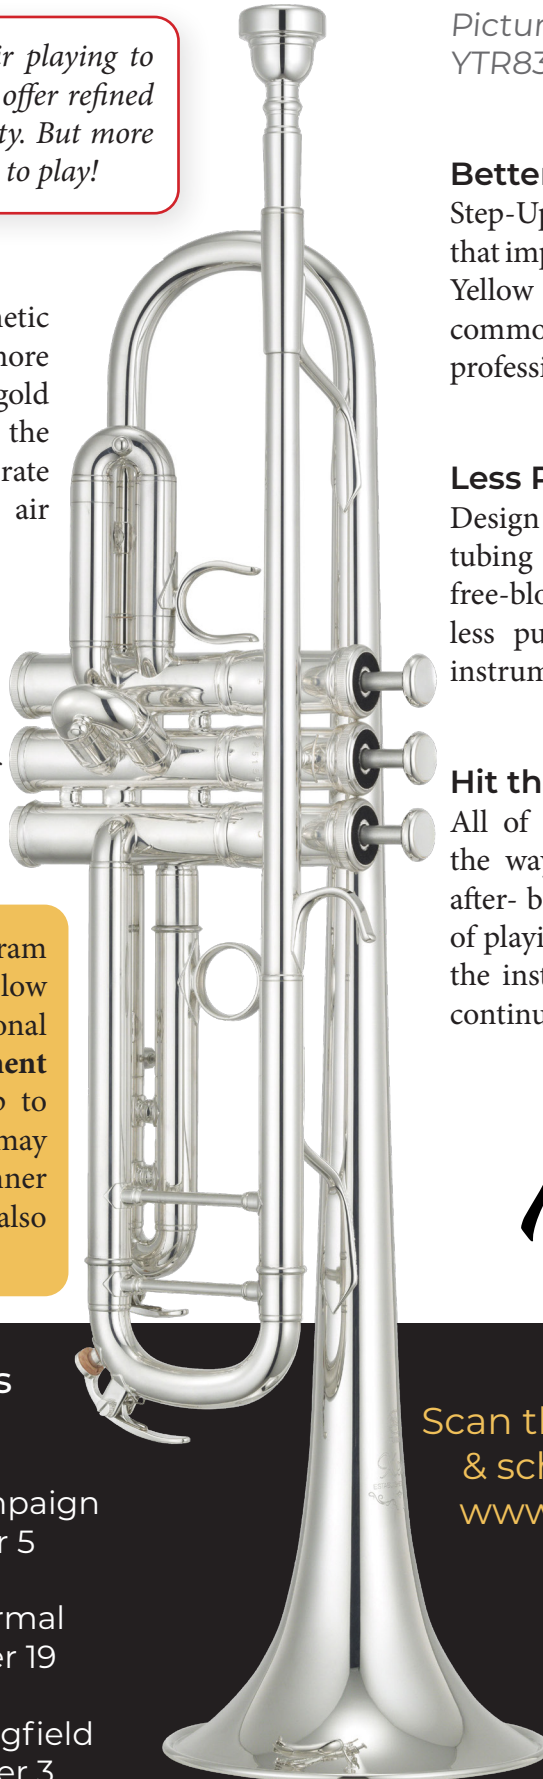

## Instant Response

Silver plating is more than just a cosmetic change to the instrument; silver is more than 10x thinner than traditional gold lacquering. With less weight on the tubing, the trumpet is able to vibrate freely. Players will appreciate how air instantly turns into sound.

## Improved Projection

Changes such as one-piece bell construction and thinner bell flares drastically increase the projection of Step-Up trumpets.

Our **Bravo! Rent-to-Own** program makes it easy to upgrade with low monthly payments and optional **Maintenance & Replacement** protection for peace of mind. Up to eighteen (18) months of equity may roll over from a current beginner rental. More financing options are also available; see store for details.

## Better Sound

Step-Up trumpets use specialized brass alloys that improve the tonal core of the instrument. Yellow Brass and Gold Brass are the most common mixes featured in intermediate and professional level trumpets.

## Less Resistance

Design improvements to the leadpipe, tubing bends, and pistons result in a more free-blowing trumpet. Players will feel less pushback as they blow through the instrument.

## Hit the High Notes

All of the changes mentioned above pave the way for what every trumpet player is after- better high notes. While it stops short of playing the notes for you, players will feel the instrument working with them as they continue to climb those scales.
