

THE STEP-UP DIFFERENCE

For students who wish to take their playing to the next level, Step-Up instruments offer refined sound, intonation, feel, and flexibility. But more importantly, Step-Ups are simply more enjoyable to play!

Better sound

Step-Up horns use specialized brass alloys that improve the tonal core of the instrument. Yellow brass and gold brass are the most common mixes featured in intermediate and professional level horns.

Improved Projection

Changes such as one-piece bell construction and thinner bell flares drastically increase the projection of Step-Up horns.

Hit the high notes

The additional thumb trigger activates a second set of tubing that transposes the horn to the key of Bb. Players will find it much more comfortable to play the high notes found in advancing literature.

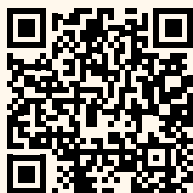

Geyer or Kruspe? Your choice!

Step-Up horns are available in two styles: Geyer and Kruspe. Geyer horns play with less resistance, while Kruspe horns are known for their dark tone. One isn't better than the other—it's all about your preference!
